(k) Provisions and contingent liabilities

A provision is recognized in the financial statements where there exists a present obligation as a result of a past event, the amount of which is reliably estimable, and it is probable that an outflow of resources would be necessitated in order to settle the obligation. Contingent liability is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise, or is a present obligation that arises from past events but is not recognized because either it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or a reliable estimate of the amount of the obligation cannot be made.

(l) Foreign exchange transactions

Foreign currency transactions are recorded at the rate of exchange prevailing on the date of the respective transactions. Monetary foreign currency assets and liabilities remaining unsettled at the balance sheet date are translated at the rates of exchange prevailing on that date. Gains / (losses) arising on account of realization / settlement of foreign exchange transactions and on translation of foreign currency assets and liabilities are recognised in the Statement of Profit and Loss.
